AIP SUPPLEMENT

02/15
15 OCT 2015

EFFECTIVE DATE : 15 OCTOBER 2015.

Subject : Procedure for activation of BAF Firing Range at Shah Amanat
International Airport, Chittagong.

1. A Firing Range is located on the northern side strip at a distance of 375 feet from the centre line of the runway and about 25 feet above the aerodrome elevation of Shah Amanat International Airport, Chittagong. The Firing Range will be relocated soon. As such, the following procedures shall be adhered to ensure safe and efficient conduct of aircraft operation at Shah Amanat International Airport, Chittagong as an interim arrangement until the existing range is permanently deactivated and demolished :
 - a) Firing hut should be manned with sufficient communication facilities to ensure uninterrupted communication with tower.
 - b) Firing will only be activated on the basis of the time slot given by ATC.
 - c) Firing has to be stopped as and when required by ATC.
 - d) All conversations are to be made on walkie-talkie Channel-1, which has the recording facility.
 - e) Personnel involved with the activation of firing range shall be adequately trained on the coordination procedures as mentioned above.
2. The procedures shall come into force immediately.
